

Assignment # 10: Running locally, Apache server, MySQL server, and PHP using WampServer

Erik Rairden, 4/18/18

Part 1, install and run wamp server.

The screenshot shows the phpMyAdmin interface for a MySQL server. The left sidebar lists databases: New, information_schema, mydb, mydb2, mysql, performance_schema, and sys. The main content area is titled "Server: MySQL 3306" and shows "Network traffic since startup: 1 MiB". It indicates the server has been running for 0 days, 1 hour, 55 minutes, and 5 seconds, starting on Apr 18, 2018 at 11:33 PM. Below this, two tables provide detailed traffic and connection statistics:

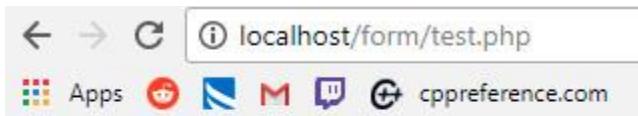

Traffic	#	Ø per hour
Received	284.9 Kib	106.8 Kib
Sent	788.5 Kib	411.1 Kib
Total	1 MiB	517.9 Kib

Connections	#	Ø per hour	%
Max. concurrent connections	2	---	---
Failed attempts	3	1.56	1.24%
Aborted	0	0	0%
Total	241	125.65	100.00%

Part2, test a simple php page. And make a simple table.

The screenshot shows the phpMyAdmin interface for the "mydb" database. The left sidebar lists databases: New, information_schema, mydb, New, test, mysql, performance_schema, and sys. The main content area is titled "Table: test" and displays the structure of the "test" table. The table has two columns: "id" (int(255)) and "name" (varchar(255)). The "id" column is defined with "AUTO_INCREMENT", "Change", "Drop", "Primary", "Unique", "Index", "Spatial", "Fulltext", and "Distinct values" options. The "name" column has similar options. Below the table structure, there are tabs for "Indexes", "Partitions", and "Information". The "Information" tab provides details about space usage and row statistics:

Space usage	Row statistics
Data 0 B	Format dynamic
Index 1 Kib	Collation utf8_general_ci
Total 1 Kib	Rows 0
	Next autoindex 1
	Creation Apr 18, 2018 at 05:48 PM
	Last update Apr 18, 2018 at 05:48 PM

Hello World!

Part3, import an existing database or create a new one. I imported yours.

localhost/phpmyadmin/sql.php?server=1&db=mydb2&table=info&pos=0&token=4754a6584e0fc89370c63dfbc991f154
